Subject: Microsoft Settlement

I was very disappointed to learn that US District Judge J. Fredrick Motz rejected a settlement that would have resolved the class-action lawsuits filed against Microsoft.

Enough is enough! First we had an incompetent and obviously biased Judge Penfield and now this.

We are still reeling from the attack of 9/11. Our country is at war, our economy in a shambles, thousands of citizens are out of work and thousands more will shortly join them. I thought Microsoft made a great offer that would have benefited the company, the country and the underprivileged but apparently there are those who are hell bent on destroying a great company, major employer and generous benefactor.

Could it be that the goal is to transfer more of our business to Asia or is it to pander to the incompetent and jealous competition here at home?

In the interest of all concerned, it is time to settle this case for once and for all.

Then we can direct all of our legal resources and skills towards salvaging the savings, pensions and jobs of the unfortunate citizens ravaged in the horrific, real and major scandal now at hand:-Enron.

Very truly yours,
Maureen J. Killeen
